

Apex162 MINI STEREO UNIDIRECTIONAL CONDENSER

APPLICATIONS: Film & Broadcast, Video, ENG (Electronic News Gathering), Remote Source Recording, Ambient Recording, Live Event Recording, Computer Audio Input Mic, Podcasting.

DESCRIPTION:

The Apex162 is a true stereo mini condenser microphone designed specifically for use with MiniDisc recorders, portable DAT or select MP3 / Remote Hard Drive recorder/players.

The 1/8th inch mini TRS connector is fixed directly to the microphone and mounted on a swivel base allowing the mic to be angled up to 90 degrees forward when attached directly to a recording device. A 4.3 metre (14 foot) mini TRS extension cable is included for maximum versatility. The Apex162 requires 1.5-volt DC phantom power to operate.

Ideal for event recording, Electronic News Gathering, ambience recording or for use in broadcast, the small and inconspicuous Apex162 is shipped with pop filters and a five-metre cable with TRS 1/8th inch mini-jack. Small and inconspicuous design makes the Apex162 ideal for use in any application where quality stereo recording is required, yet the microphone itself needs to be virtually invisible.

FEATURES:
